COURSE PROJECT - PHASE ONE (20%)

YOUR TASK

A client has approached you with the task of creating a dynamic web application. Intended as an online space for developers and coders to connect and network, your application should allow users to add their name, email, current city and skills. The application should include a page to view all user info and edit and delete user information.

THE SPECS

As the web application developer, you'll need to create the following:

1.) Table in a database that holds: user id, user name , user email, location and skills.

2.) HTML form to obtain user info (name, email, location, skills)

3.) A PHP script that VALIDATES user info and then saves to the database.

4.) An HTML page that displays all information submitted by users in a pleasing, user-friendly

way.

5.) A separate HTML page for the client that provides the ability to delete and update records.

6.) PHP scripts that delete and updates info stored in the database

7.) A short project review paragraph explaining any challenges you encountered, what you learned and next steps.

8.) **A LIVE LINK TO YOUR HOSTED APPLICATION**

Challenge Yourself! - Bonus marks are available for going above and beyond project requirements (think login functionality/ security etc...)

PROJECT EXPECTATIONS

Criteria	Something's Missing	Getting There	Great Work	Awesomesauce
Application Design/ Usability (2 marks)	Developer did not use HTML/CSS to create an attractive and user-friendly user interface	Developer usedHTML/CSS to create a fairly attractive and user-friendly user interface	Developer usedHTML/CSS to create a very attractive and user-friendly user interface	Developer usedHTML/CSS to create an extremely attractive and user-friendly user interface
Form Validation (6 marks)	Developer did not include form validation in the application.	Developer included some PHP form validation in the application.	Developer included appropriate PHP form validation in the application	Developer included a big degree of appropriate PHP form validation in the application
Application Functionality (8 marks)	Application does not function as intended.	Application functions somewhat as intended.	Application functions as intended.	Application smoothly functions as intended.
Project Review (4 marks)	Project review was not completed.	Project review was completed. More detail/information could be added.	Project review was completed and contained a good deal of information/ insight.	Project review was completed with a high degree of insight and professionalism.

PROJECT DEADLINE - WEEK 6 @ 11:59pm
